DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I in the reply filed on July 23, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

2. The abstract of the disclosure is objected to because it is not on a separate sheet. Correction is required. See MPEP § 608.01(b).

Information Disclosure Statement

3. The information disclosure statements filed 10/13/2008 and 11/10/2008 have been fully considered. An initialed copy of said IDS is enclosed herein.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7, 18, and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "rubber-resin modified paraffin polymer waxy system" is indefinite. Said term does not have an art-accepted definition.

Furthermore, said term has not been defined in the specification. It is not clear from the claims or the original disclosure what components are present in the "system."

Response to Arguments

Applicant's arguments have been fully considered but are not persuasive.

Initially it is noted that claim 21 has been added to the rejection statement. The exclusion of claim 21 from the rejection statement in the Office action mailed 6.25.2008 was an obvious error since all pending claims were held to be indefinite based upon a limitation in independent claim 1.

Applicant argues the limitation "rubber-resin modified paraffin polymer wax system" is definite. In support of said position, applicant points to page 12 in the specification. Said disclosure has been fully considered but is not persuasive. While the disclosure of page 12 demonstrates the limitation has 112, first paragraph support, the disclosure fails to clarify what components are present in the system. Specifically, it is clear a paraffin wax is present. However, it is not clear whether the composition may comprise any paraffin wax or that the wax must be a "paraffin polymer." If the wax can be any paraffin wax, then it is unclear what the "polymer" limitation refers; is the polymer an additional component in the blend? Is the polymer the same as the resin and/or rubber? If the wax must be a "paraffin polymer," the term is indefinite because it is not clear what is meant by a "paraffin polymer" wax. Furthermore, it is not clear if "rubber-resin" refers to a blend of a rubber and a resin or if the term refers to a resinous rubber. It is also not clear if the "paraffin polymer" has to be the predominate component in the blend since the limitation states the rubber-resin "modifies the

paraffin-polymer. The disclosure on page 12 fails to clarify any of these questions. Therefore, the rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
